Kamran Ibrahim
Web Developer

Solution-driven Web Developer adept at contributing to highly collaborative work environment, finding solutions and determining customer satisfaction. Proven experience developing consumer-focused websites using HTML, CSS, Python and JavaScript. Built products for desktop and mobile app users over 1+ year, meeting highest standards for web design, user experience, best practices and speed. Designed and developed web applications across multiple APIs, third-party integrations and databases.

Projects

2021 to - Current

Hostel Management System (Django)
- Developed a comprehensive hostel management system using Django, allowing users to manage room bookings, student information, and administrative tasks efficiently. Implemented both front-end and back-end functionalities.
- Implemented a secure user authentication system using Django's built-in authentication modules, enhancing data privacy and access control.

Real-Time Cryptocurrency Price Tracker (ReactJS & APIs)
- Created a real-time cryptocurrency price tracking application using ReactJS for the frontend and integrated APIs to fetch live data. The app allows users to visualize current cryptocurrency prices and trends.
- Utilized React's state management to ensure seamless updates of cryptocurrency prices in real-time, providing a smooth user experience.

Movie Recommendation Website (Django & React)
- Developed a movie recommendation website that allows users to explore movie details, ratings, reviews, and receive personalized movie recommendations based on their preferences, integrated APIs to fetch movies data from IMDb API.

Education

Sept 2019 to Mar-2022

Master of Computer Science

Professional development completed in Website Development

Continuing education in Computer Science

Certifications

Microsoft MTA 98-381 Certified
